

EXAMPLES OF ASPERGERS/ADHD CARDS

My Child Has ADHD
(Attention Deficit Hyperactivity Disorder)
This is a medical condition affecting the frontal lobe of the brain

Children with ADHD...

1. Are not bonkers
2. Are often unable to control their actions
3. Can be very disruptive which is a symptom of ADHD
4. Are **NOT** the result of bad parenting
5. Can be very loving and well behaved...honest!

Please try to understand

visit www.adders.org for more information © adders.org

This young person has Asperger syndrome

- Asperger syndrome is a developmental disability that affects social and communication skills
- People with Asperger syndrome may behave in unpredictable ways as a result of their difficulty in understanding language and social situations
- Please help us by being understanding and showing tolerance
